

# 2016 Bond Issue - Project Status Report

May 17, 2017

Campus	Project	Status
APPLe Digital Academy	Renovations	Programming Phase
Ascension Head Start	Addition/Renovations	Programming Phase
Bluff Road Site	New Middle School	Programming and Wetlands Permitting
Bullion Crossing Site	New Primary School	Programming and Wetlands Permitting
Highway 73	New Primary School	Programming and Wetlands Permitting
Germany Road	New Primary School	Programming and Wetlands Permitting
St. Amant High School	Complete the Freshman Academy Concept	Design Phase
East Ascension High School	Complete the Freshman Academy Concept	Design Phase
Prairieville Middle School	New Gymnasium	Design Phase
Various Primary Schools	Covered Play Pavilions	Design Phase
Districtwide	Security Improvements	Planning and Procurement
Lowery Middle School	Addition/Renovations	Fall 2017 Estimated Design Start
Donaldsonville High School	Renovation of Old Library	Fall 2017 Estimated Design Start
Dutchtown Primary School	Addition/Renovations	Spring 2018 Estimated Design Start
Parker Road Site	Future High School Site Planning/Permitting	Fall 2018 Estimated Planning Start

Programming - This step involves gathering the information necessary for the Architect to Design the Building. Survey, geotechnical report, drainage study, traffic study, wetlands permitting, educational specifications are some of the items that must be prepared prior to hiring the Architect. Once these are in place, the design phase can start.

Design Phase - The Architect prepares a series of drawings and cost estimates leading up to a set of construction documents that will be used to solicit contractor bids for the project. This phase can take anywhere from 4-12 months depending on the size of the project.

Construction Phase - Once a contractor has been selected, a contract will be signed. The contract will include a fixed duration that can be extended only through contract terms such as rain delay or other owner delays.
